

18.0L Engine

Over 650 kW (870 hp)

JOHN DEERE

Come grow with us

John Deere is taking diesel power to new levels of performance and torque with our 18.0L engine. With horsepower exceeding 650 kW (870 hp), you'll be able to power your large machines and complete heavy-duty jobs. The 18.0L was also designed to make service and repairs easy.

- Extends the engine platform above 650 kW (870 hp) to handle heavy-duty workloads
- Model-based controls enable advanced prognostics capabilities and excellent transient response
- Fewer overall sensors compared to previous engine models
- Rear gear train provides low crank stress and engine noise
- Series turbochargers deliver excellent performance and response
- Hydraulic lash adjusters eliminate valve lash maintenance
- Integrated wiring harness is tight to the engine, which protects wiring during assembly and service

Contact your John Deere engine distributor for more information.

This literature has been compiled for worldwide circulation. While general information, pictures and descriptions are provided, some illustrations and text may include finance, credit, insurance, product options and accessories NOT AVAILABLE in all regions. PLEASE CONTACT YOUR LOCAL AUTHORIZED DEALER OR DISTRIBUTOR, AS APPLICABLE, FOR DETAILS. John Deere reserves the right to change specification, design and price of the products described in this literature without notice. John Deere's green and yellow color schemes, the leaping deer symbol, and JOHN DEERE are trademarks of Deere & Company.
